

Internet and Networking

The right connection. Every time.

Both your internet and network are critical business performers that just need to work.

Downtime can have a considerable impact on your business, from a financial and productivity perspective, so measures need to be put in place to ensure you are protected.

The average cost of network downtime is:

\$5,600/min

Our Service Benefits at a Glance

We assess, design and deliver fully optimised and secure network infrastructure and secure business-grade internet access you can rely on.

Our services include consulting, architecture, review and assessment as well as managed services. Whether you need a managed network, business-grade internet connection, or an integrated wired and wireless network that keeps the bad guys out, we can do it for you.

Expert Knowledge

Our certified consultants and engineers can recommend, setup and configure the best solution for you.

Custom Solutions

We can assess your workloads and access requirements and deliver the connection you need to work quickly and efficiently.

Service Management

We can manage your internet connection for you - no more waiting on hold or being put in a queue. We'll get your internet issues solved quickly.

Added Security

We offer fully secured internet solutions including next-gen firewalls, network security and secure WiFi solutions.

The Missing Link understood our specific business requirements and delivered an efficient network which services our regional spread effectively. Our applications performance and connectivity have improved, and we are able to operate our business more efficiently and productively. Not only has this project improved our operations but we've also been able to reduce business risk and cut future IT costs.

Denis Reeves | Associate Director, Boyce CA 

The Missing Link provides connections you can rely on

A reliable internet connection is vital for your business, but not all connections deliver the same results in terms of speed and availability.

No longer just a simple path to the web, your business internet connection supports critical corporate functions like video conferencing, moving information between your business and the cloud, and accessing important business applications.

Your business internet connection needs to be fast, reliable, secure and tailored to your company's needs. Our experienced engineers can evaluate your workload and access demands to customise the best internet solution for you.

Talk to us about any of our Internet and Networking solutions:

Network Integration: Seamlessly integrate your wired and wireless networks for simple mobilisation with no drop outs.

Fast & reliable connections: Whether you're after high availability, symmetric downloads and uploads or accessing mission critical apps in the cloud, we can recommend the best connection for you.

Internet as a service: We can install and manage your network devices and WiFi for you, so you don't have to.
