

# Managed Consulting

Sound advice from a team you can trust

Trusted advice can be hard to find these days, but that's what we provide you with at The Missing Link.

We're different to other IT business consultants because our approach focuses on the outcomes your business wants to achieve, not just the latest technology.

## No.1

IT is the No.1 driver of growth in the Australian consulting market because businesses are striving to digitise faster.

## Our Service Benefits at a Glance

**We assess your current environment and make recommendations based on your needs and business goals.**

With technology rapidly changing, planning based on what works now, but also considering what will work in the future, is a niche talent.

Our IT consulting specialists can work with you to assess your current environment, identify any areas of concern, and determine remediation strategies. We provide Managed Consulting services to help you in every area of your IT environment.

### Health Check

A review of your existing or new IT system, to test network security, back-up effectiveness, capacity, and performance.

### Penetration Testing

Our expert security consultants will attack a network to expose security weaknesses & identify vulnerabilities. We can then provide comprehensive solutions.

### Disaster Recovery Planning

We assess your risks and ensure you have an appropriate Disaster Recovery Plan in place.

### Advanced Escalation Consulting

We offer expert consulting and support services, for when a situation exceeds your internal capabilities or capacity.

BPAY has had a long and successful relationship with The Missing Link working on a variety of projects. This project was no exception, any challenges encountered along the way were handled professionally and in a timely manner to ensure tight deadlines were met and a successful deployment was achieved

Sean Ollerton | Principal Engineer, Converged Technologies, BPAY

## The Missing Link Provides IT Expertise When You Need it Most

As one of Australia's most awarded IT companies, our team can assist with every area of your IT environment, whether that be disaster planning, cloud services, cyber security or anything else that arises.

Our specialist cyber security team is the most certified in Australia and our IT business consultants are highly experienced with all the appropriate qualifications. Take the stress out of planning and strategy and let us do it for you.

Talk to us about:

**Architecture and Design:** We can provide you with strategic consulting when the complexities of your systems require deeper technical/commercial knowledge.

**Resourcing:** Our skilled consulting staff are available when you need them, for short or long-term assignments.

**Project Management:** Our specialist project managers are experienced in the successful planning, execution, monitoring, control and closure of a project.

**Infrastructure, Storage and Security Assessments:** Establishing what you have and what you need, both now and in the future is critical for a healthy IT environment.
