

Microsoft Teams

The hub for teamwork in Microsoft 365

Microsoft Teams is an integrated workplace solution powering a new culture of collaboration and productivity.

The platform stretches far beyond chat, meeting, and calling, making it the focused hub for everything your team does.

4 hrs

Per week are saved by improving collaboration and information sharing in Teams.

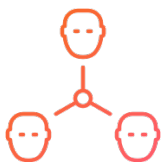

Microsoft Teams at a Glance

Microsoft Teams provides a versatile conversation experience through one-on-one chats, group and threaded conversations.

Microsoft Teams takes collaboration and productivity to the next level by integrating your favourite tools across Office 365, including Word and Excel, SharePoint, PowerPoint, OneNote, Planner and Power BI.

Beyond this, cloud voice gives users an end-to-end communication system to streamline connectivity and collaboration across teams, workplaces, and time zones.

With these integrations, users can seamlessly switch between editing documents, shared dashboards and planners, group chats, voice and video calls.

Stay connected

Easily contact your team members through one-on-one chats, group conversations, audio or HD video calls.

Customise and extend your user-experience

Integrate existing or new applications and automate workflows in Teams.

Collaborate seamlessly

Share your work with built-in access to Office 365 apps including SharePoint, OneNote and Planner.

Work in confidence

Keep your collaboration platform safe with the enterprise grade security and compliance of Microsoft Office 365.

“ Since engaging The Missing Link, we now have a consistent approach to our IT infrastructure, and our staff members are working effectively and securely from remote locations. Given their fantastic reputation within the industry, it was no surprise that The Missing Link was highly knowledgeable, friendly and very responsive right from the start. Over the years, we've had a number of engagements, and I always feel comfortable reaching out to The Missing Link team for any IT advice. Our most recent project, migrating and rolling out of Microsoft Teams and Intune, was a huge success. The Missing Link team are great communicators, which I believe sets them apart from others and I'd highly recommend them to anyone looking for comprehensive IT infrastructure solutions.
