

# Proof of Value Project

Robotic Process Automation (RPA)

Interested in RPA for your business but not sure where to start?

Our Proof of Value demonstrates the business benefits of RPA and helps you identify the processes worth automating.

Lower your operational costs by

 **30%**

## Our Solution at a Glance:

The key to starting your automation journey is demonstrating the value of the technology and its feasibility.

The Missing Link can deliver a Proof of Value project that allows you to experience the value of RPA within your business - reducing tedious and repetitive tasks, enabling users to be more productive. This engagement is achieved by crowdsourcing and evaluating ideas for

automation directly from your team to identify where your business can benefit most from RPA.

From here, we automate your process using evaluation software allowing you to see the power of automation and the speed of its development.

Our Proof of Value helps with subsequent adoption of RPA and builds confidence in the validity of the business case for change without significant investment, risk or disruption.

### Optimised Solutions

Rethink your business processes to deliver faster and better outcomes for your customers.

### Minimal Disruption

Our solution is non-intrusive and leverages existing infrastructure without causing disruptions to underlying systems.

### Small Upfront Investment

Experience a low-risk, accelerated starting point for RPA with no software costs.

### Fast Value Realisation

See how RPA will fit in with your existing systems, applications and infrastructure.

“

Our team members are now able to save time, improve efficiency and increase productivity as they concentrate more on valuable tasks rather than mundane activities. The Missing Link is one of our trusted business partners within the industry, and their team are highly knowledgeable and responsive, I would highly recommend them to anyone looking to kick-start their RPA journey.

Craig Ashwood | General Manager, Orca Tech

## Our Unique Approach:

**Discovery:** We assist you to generate an automation pipeline and prioritise your process automation roadmap, allowing your team to suggest and track automation idea.

What do you get? A prioritised process for a proof of value automation, new software skills and a qualified automation pipeline for your business case.

**Build a Bot:** We set up RPA software and work with you to gain IT systems access. Next up, we design, build and test a bot, then we evaluate the outcomes.

What do you get? We build a bot for you in 10 days! Experience the RPA development lifecycle and see real automation results against targets.

**Pilot:** Happy with your Proof of Value bot? Time to put your bot to work! We work with you to refine your bot for production readiness, license your software and build, test and deploy your bot.

What do you get? A production-grade RPA automation with exception management. We monitor and evaluate the results to give you experience in deploying automation to the business.
