Secure SD-WAN

Supporting Secure Digital Transformation

Organisations are rapidly moving their business critical applications and workloads to the cloud. Secure SD-WAN provides a secure, cost effective and adaptable replacement to a traditional WAN solution, enabling superior business digital transformation.

72%
of organisations say security is their topmost concern when it comes to their WAN.

Our Service Benefits at a Glance

We assess, design and deliver optimised Secure SD-WAN infrastructure nationally. Our services include consulting, architecture, assessment and managed services.

Whether you want to replace your legacy MPLS network, increase WAN performance, or securely connect your branch offices, we can do it for you.

Our Secure SD-WAN solution includes industry leading next-generation firewall (NGFW) security, SD-WAN, advanced routing, and WAN optimisation capabilities, delivering a secure networking WAN edge transformation in a unified offering.

Reduce Costs
We deliver industry-leading SD-WAN, NGFW, Advanced Routing and Optimisation services with centralised management. Our solution provides a low total cost of ownership (TCO) by reducing MPLS bandwidth costs and deploying new branches quickly for efficient operations.

Enhance Application Experience
Our solution is application aware and delivers an optimised experience across Data centres, SaaS, and Public Cloud. Providing our clients with application visibility, usage monitoring, advanced analytics and centralised management.

Recovery Time
Our solution enables secure direct internet access at the WAN edge with integrated next-generation firewall capabilities. With leading threat protection and threat intelligence services, we are able to deliver a high level of security effectiveness.

Our SD-WAN service offerings

Security: Secure SD-WAN which includes Next Generation Firewall, Advanced Routing and Software Defined Wide Area Networking.
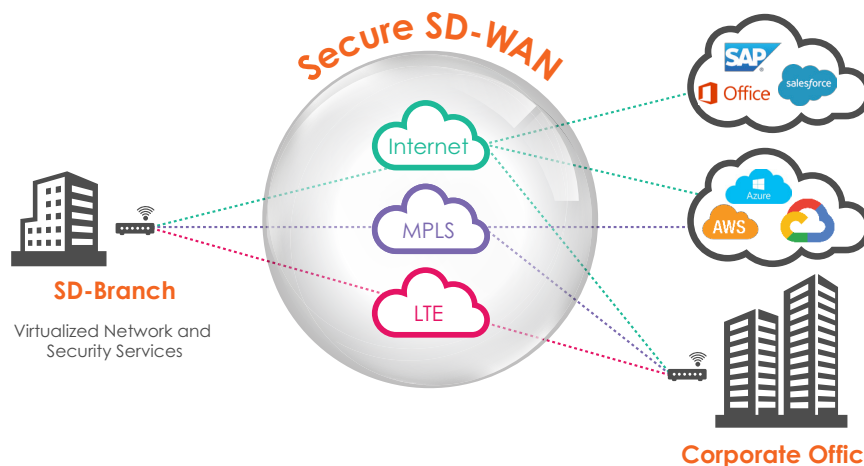

Expert Knowledge: Our certified consultants and engineers can recommend, set-up and configure the best solution for you.

Custom Solutions: We can assess your requirements and deliver the solution you need to support your digital transformation and secure inter-branch connections.

Service Management: We can manage your secure networking solution for you - no more waiting on hold or being put in a queue. We'll get your internet issues solved quickly.
