## Our Service Benefits at a Glance

**Video conferencing is the modern answer to traditional meetings, providing human interaction and improving the remote meeting experience with valuable face time.**

Today's phone systems go beyond call processing; they are an integral part to your business communications and collaboration strategy.

The latest technologies incorporate video conferencing, online collaboration, mobility and instant messaging, creating a unified communications solution.

Our specialists can assess your current tools, identify any gaps and work with you to achieve your desired communications strategy and outcomes. The right tools with the proper integration can have a transformative effect for your business.

### Increase Productivity & Flexibility

Users can connect from any device at any time, like from the back of an Uber between meetings, for example.

### Communications Unified

Connect your voice, video, data and applications; collaborate with anyone, anywhere no matter the device or operating system in use.

### Modern Workplace Enablement

VoIP is included in the suite of tools now considered must-haves in the modern workplace, as it integrates with CRM systems, O365, calendars, online meetings and enables flexible working.

### Communications Strategy

Perhaps there are things you need now and others you need in the future? We can help with a communications strategy and roadmap to plan for future changes.

The Missing Link are a fantastic team, highly professional and motivated with a balanced approach between good relationship management and solid technical knowledge. I would recommend The Missing Link to any company looking to buy new or modernise their existing IT infrastructure.

## Expertise You Can Rely On

As one of Australia's most awarded IT companies, our team can assist with every area of your IT environment, whether that be disaster planning, cloud services, cyber security, communications or anything else that arises.

The latest video conferencing and telephony technologies allow for simple integrations, support flexible working, reduce travel-related costs and enrich traditional meetings.

Talk to us about:

**Scalability:** Quickly add lines and extensions as your company grows or experiences peak times, a flexible system allows you to manage the ebbs and flows with ease and less cost.

**Endless Connectivity:** We can connect remote workers, multiple sites, home offices and mobile devices so your staff and clients, near and far, are always easy to communicate with.

**Boosting Your Marketing:** With a robust video conferencing solution in place you'll have more marketing and training options like holding webinars or broadcasting announcements.

**Reducing Costs:** There is no need to fly staff from interstate or to incur other travel expenses when face-to-face meetings can be held in comfort anywhere, with any device.
