

Microsoft Intune Health Check

Overview

Microsoft Intune is central to modern device management, enabling organisations to secure, monitor, and manage endpoints across diverse environments. As Intune deployments grow and evolve, regular health checks are essential to ensure your environment remains secure, compliant, and aligned with Microsoft's latest recommendations.

A properly conducted Intune Health Check provides assurance that your device management platform is robust, policies are effective, and risks are minimised. With the increasing complexity of endpoint security and regulatory requirements, a structured review of your Intune environment is vital.

Safeguard your Device Estate

The Missing Link's Intune Health Check is delivered by experienced consultants, leveraging deep expertise in Microsoft 365 security and endpoint management. Our review identifies misconfigurations, security gaps, and optimisation opportunities, providing you with a clear roadmap for improvement.

By engaging in a tailored Intune Health Check, organisations can mitigate risks associated with policy drift, legacy configurations, and evolving threats, while enabling future growth and operational excellence.

Health Check Approach

The Missing Link's Intune Health Check covers the following core areas:

- Windows Autopilot setup
- Device enrolment and management
- Application deployment and updates
- Configuration profiles (Windows, iOS, Android, macOS)
- Reporting and monitoring
- Device compliance policies
- Conditional Access (MFA, location, risk)
- Endpoint security (Defender integration)
- RBAC and admin permissions
- Integration with Microsoft 365 services

Timeline

The Intune Health Check is typically completed within 2 to 4 weeks, following these phases:

Highlights

- **Prioritise** device security and compliance
- **Increase** operational efficiency and visibility
- **Minimise** risks and misconfigurations
- **Follow** Microsoft best practices
- **Enable** secure and scalable device management

Deliverables

The Missing Link's will provide:

- A comprehensive report detailing findings, risks, and recommendations
- Presentation of results and roadmap for remediation or optimisation
- Knowledge transfer and Q&A session with stakeholders
