The Missing Link

Clear up the complex world of ICT security with us.

As cyber threats evolve, it is crucial to protect your valuable assets. The Missing Link offers a comprehensive range of cyber security solutions and services that cater to businesses of all sizes:

- Assess your security controls and practices.
- Identify gaps, vulnerabilities and threats.
- Design, build and manage security solutions to protect your organisation from damaging breaches.

We provide strategic advice, offensive security, and tactical support, ensuring you are in good hands with our extensive skills, experience and over 100 vendor partners.

An Australian cybercrime is reported every 7 minutes.

Cyber security capabilities

Security resilience testing

Cyber attacks can occur at any time. Our specialised services help you build your cyber resilience and confidently embrace new opportunities for growth while protecting your critical assets. We are experts in leading-edge cyber security areas such as Cloud, MITRE, Containers and Operational Technology.

Red & Purple teaming

Challenge your blue team. Our attack simulations improve your overall security posture and incident response capability. Red and purple teaming identifies people, process, and technology weaknesses within your organisation in the way a real-world attacker would, and then provides detection, response and remediation guidance.

Managed Global Security Operations Centre

Specialist resources, trained in your chosen technologies. Our Managed Global Security Operations Centre (GSOC) services provide 24/7 protection against cyber threats. We give you real-time visibility and incident response, supporting a timely response to security threats before they cause harm.

Security governance, risk & compliance

Achieve your business goals without crossing regulatory lines. Our team develops cyber risk programs in line with the strategic objectives and risk appetite of diverse organisations. Using a holistic risk viability model, we will bring you in line with standards like the ASD Essential 8, ISO27001 and other industry-specific regulations.

Solution deployment & integration Centre

Protect your network, secure your assets and equip your staff with the tools to mitigate cyber attacks. Secure your organisation with tailored security solutions, deployed and integrated by our experienced team. We offer technology agnostic advice, ensuring you receive the best solutions for your business needs.

Application security

Keep customer data secure and build customer confidence. Our application security services mitigate risk from internal and third-party sources, keeping your customer data secure. We help secure your applications through maturity assessments, code reviews, penetration testing, and application security training.

Why choose The Missing Link?

| Technology agnostic advice | CVE Numbering Authority | In-house expertise with OSCP, OSCE, CISM, CISSP | 24/7 proactive operations & response | Turnkey solutions |

A proven process for managing the entire security lifecycle

Achieve measurable results. Our Security Engagement Model reduces your vulnerability to cyber threats – no matter where you are in the security lifecycle.

Assess

Know the strength and maturity of your current cyber security posture, and where you need to be.

Improve

Implement the right solution at the right scale for your business, and you will be confident nothing is left to chance.

Manage

Let our Global Security Operations Centre manage complex tools and improve your detection and response capability.

Our team works hard, the industry recognises.
